Re: Recommendation for Nancy Bhargava

Good Afternoon,

I am pleased to give Nancy my highest recommendation for this position. I am currently having Nancy Bhargava as a student in my CSC532 Introduction to Machine Learning graduate class. She is performing well and is among the top 10% of her class with a consistent A grade.

Nancy is keen to deepen her understanding and actively contributes to class discussions with thoughtful questions. She is also collaborating with me on a project for the UIS Performing Arts Center, where we are developing a recommender system to identify potential customers for new shows. Nancy is responsible for creating the front end of this application using Streamlit. She attends meetings regularly, completes her tasks on time, and conducts independent research necessary for her project tasks. I am pleased with the progress she has made, and her dedication and attention to detail are commendable.

Sincerely,

Elham Buxton
