Re: Recommendation for Nancy Bhargava
Good Afternoon,

I am impressed with Ms. Bhargava's enthusiasm and professional demeanor as a student in my Computer Science Introduction to Data Base Systems class. During the 16 weeks of this semester Ms. Bhargava consistently demonstrates all the qualities necessary to develop into an aspiring Data Base Administrator. Nancy is especially aware of the impact of Artificially gathered Intelligence on businesses and society.

Ms. Bhargava is reliable, dedicated and eternally upbeat. She remains calm in stressful situations. Ms. Bhargava multitasks effectively and can handle a high-volume workload. She consistently meets or surpasses all weekly assignments in an exemplary manner. Ms. Bhargava has a unique perspective on data security that reflects her attention to and interest in Data Security and Maintenance. I would recommend Nancy for any position that involves Data Security. In my class there are groups of students creating tables and screens from scratch for the class project. Nancy has taken a leadership role in the project selection and flow of requirement deliverables. Always submitting project deliverables early is an important trait.

Of value to any employer is Ms. Bhargava's team player mindset, enthusiastic embrace of change, ability to work with minimal supervision and unwavering commitment to exceeding employer expectations.

Organized and diligent, Ms. Bhargava is quickly learning the technological skills necessary to develop and administer Data Base Systems.

Ms. Bhargava is a hardworking, top-performing student. If you interview and hire Ms. Bhargava, you will have an exemplary employee. she has my highest recommendation.

Sincerely,

William H. Cox
